Introduction

Data from *Statistics on NHS Stop Smoking Services* is made available in comma-separated variable (CSV) files, as well as Excel tables, to allow users to carry out their own analyses.

This document provides structural metadata, which describe the contents of each field within the CSV files. It should be read in conjunction with the main publication and the data quality statement as these will provide further details on definitions and any data quality issues that should be considered when interpreting results of analyses.

Metadata tables

There are nine CSV files and these relate to the different breakdowns provided in the Excel tables.

Please note that suppression has been applied in the Excel tables for accuracy purposes with rates being suppressed if the denominator is between 1 and 20. This same suppression cannot be applied to the CSVs. Please ensure that you check the denominator of any rates that you calculate and do not base any findings on denominators of between 1 and 20.
